

“We’re The Change” by AGAPE*

Together we can be the change
Justice soon will reign
Together we can be the change
This world’ll never be the same

I made up my mind Now is the time
We are the branches He is divine
That means we can be hands and feet
We can feed all the people we meet in the street
Malaria’s effect we can end all of that
And really all it takes is a 10 dollar net
So if you wanna change the globe
And came to show your faith and hope
We’re the same so hollar back

We can all bring peace to a world of war (war war war war “echoed”)
We can rethink ways how we see the poor (poor poor poor poor “echoed”)
We can all bring love to a world of fear (fear fear fear fear)
We can be that change and it starts right here (here here here)

Stand up don’t be constrained
People jump like it aint no thang
Compassionate justice soon will reign
Shout with me if you want that change

Malaria we will bury ya
And you will never come back to the area
No AIDS no malnutrition
We defeated you now you missing
Don’t come around here no more
You’re not welcome and neither is war
Don’t ever show your face again
That’s the attitude it take to win (let the change begin!)

We’re the change (repeated)
